

Quality Assurance

Service

MGS Horticultural is a market leader in Integrated Pest and Disease Management. We are on the pulse of the greenhouse industry both locally and globally. We know before you know. Our customized Pest Management programs will work for you and your operation. We use our tried local approach to work with our pests in our climate. MGS Horticultural Inc.'s experience brings global solution through our network of long time suppliers and partners. These vendors encompass various types of pest

control; from biological insects and bio pesticides to traditional chemistry and all types in between. We evaluate information and experience from around the world and put it to work in our own backyard.

MGS Horticultural has extensive knowledge in all areas of Pest and Disease Management to handle the common pests and the unexpected ones. With MGS Horticultural as your partner, you will have our full support to handle the day-to-day issues as well

as be prepared for any future issues. Our goal is better results for your operation and we pride ourselves as being industries Pest Management partner for over 60 years.

Products

By having MGS as your Primary Pest Management Service you have:

- Daily Shipments of Biological Products
- Local production of Biological Controls and bumblebees since 1997
- Dedicated Quality Control and lab on-site at MGS

MGS has dedicated operators to receive and ship products timely and efficiently, preferably the same day. If you are not ready for your products on the day they arrive, MGS has expanded our multi-temperature storage compartments to
