

## MGS Horticultural Inc. Signs Greenhouse Vegetable Seed Distribution Agreement With Syngenta Seeds

Leamington, Ontario, July 20th, 2009

MGS Horticultural Inc. (MGS) is pleased to announce it has entered into an agreement with Syngenta to distribute their vegetable seeds in the Canadian and United States greenhouse markets.

MGS has been in the seed distribution business for over 30 years and the new arrangement will allow MGS to expand its operations into new territories. "This agreement with MGS will expand the reach of Syngenta's product portfolio in the greenhouse industry," said

Dan Burdett, NAFTA Vegetables Head for Syngenta. "MGS is an exceptionally professional organization and we believe this relationship will greatly enhance trial and commercial support for our growers."

The agreement also strengthens one of MGS' key product offering pillars. "We are excited at MGS to have this opportunity to team up with such a well known name in the agricultural community," said Chris Stickle, CEO of MGS Horticultural Inc. "We believe Syngenta and MGS are well suited to partner in the greenhouse seed sector."
